# APLICACIONES

Minusco propone SLAK, uno scorrevole con veletta, la cui peculiarità è la dimensione ridotta e leggera del profilo di copertura e la robustezza del meccanismo di scorrimento. Secondo noi, Slak è adatto ad una ampia tipologia di contesti architettonici sia moderni che minimali .

SLAK è predisposto per il fissaggio a soffitto o a parete, nella soluzione con anta semplice, doppia e scorrevole su vetro fisso .

Coerentemente con la sua filosofia, Minusco propone SLAK ad un prezzo decisamente competitivo.

Minusco is very glad to introduce you to SLAK, its new sliding system with a special guarding case. Its peculiar features are extreme lightness and reduced size of the external case, as well as the robustness of its sliding mechanism. SLAK is suitable for a wide range of architectural applications both modern and straightforward.

SLAK can be adopted for installations on ceiling or wall. It is available in different versions with single or double panel; both solutions either with sliding panels only or with fixed side panel as well.

Minusco, in accordance with its business philosophy, wishes to promote SLAK at a very competitive price.

# APPLICATIONS

Minusco propone SLAK, una corredera con techillo cuyas peculiaredades son, la dimension reducida y el perfil ligero del techillo con la robustez del mecanismo deslizante. Por todo ello SLAK ideal para nuevas soluciones arquitectonicas modernas ya sean grandes o pequeñas.

SLAK, se puede fijar en el techo o pared, para puerta simple o doble y deslizante con un vidrio fijo.

Minusco con su filosofia avanzada, propone el slak a un precio asequible y muy competitivo.

MINUSCO freut sich, das neue Schiebetürsystem "SLAK" vorzustellen.

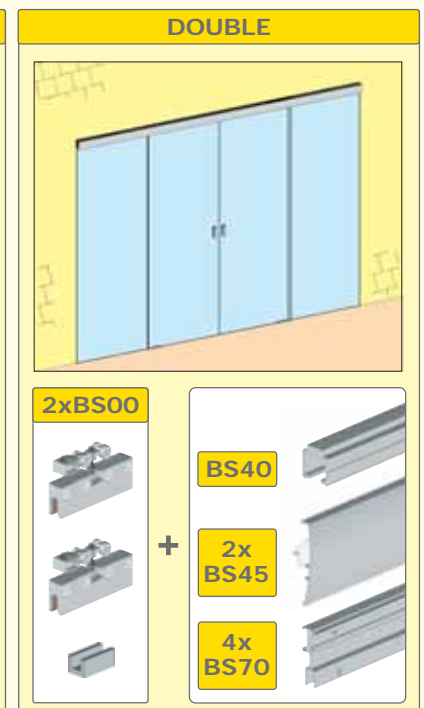

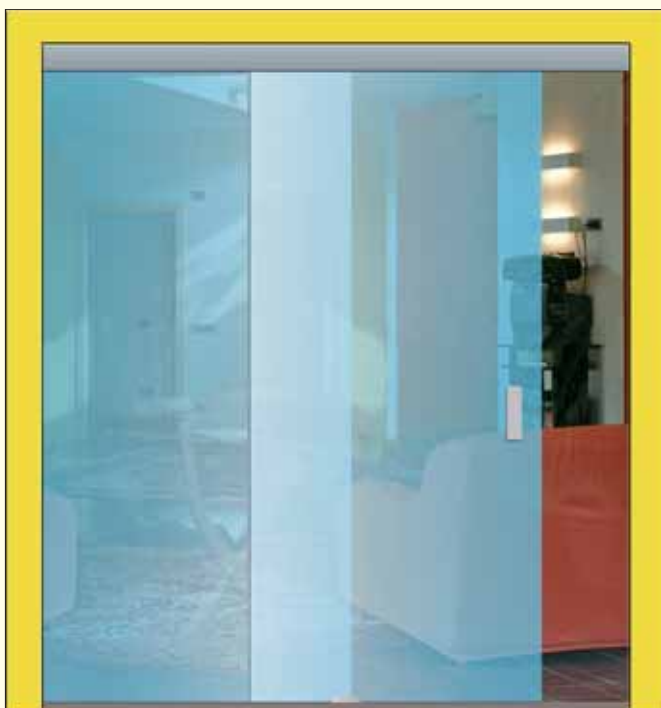

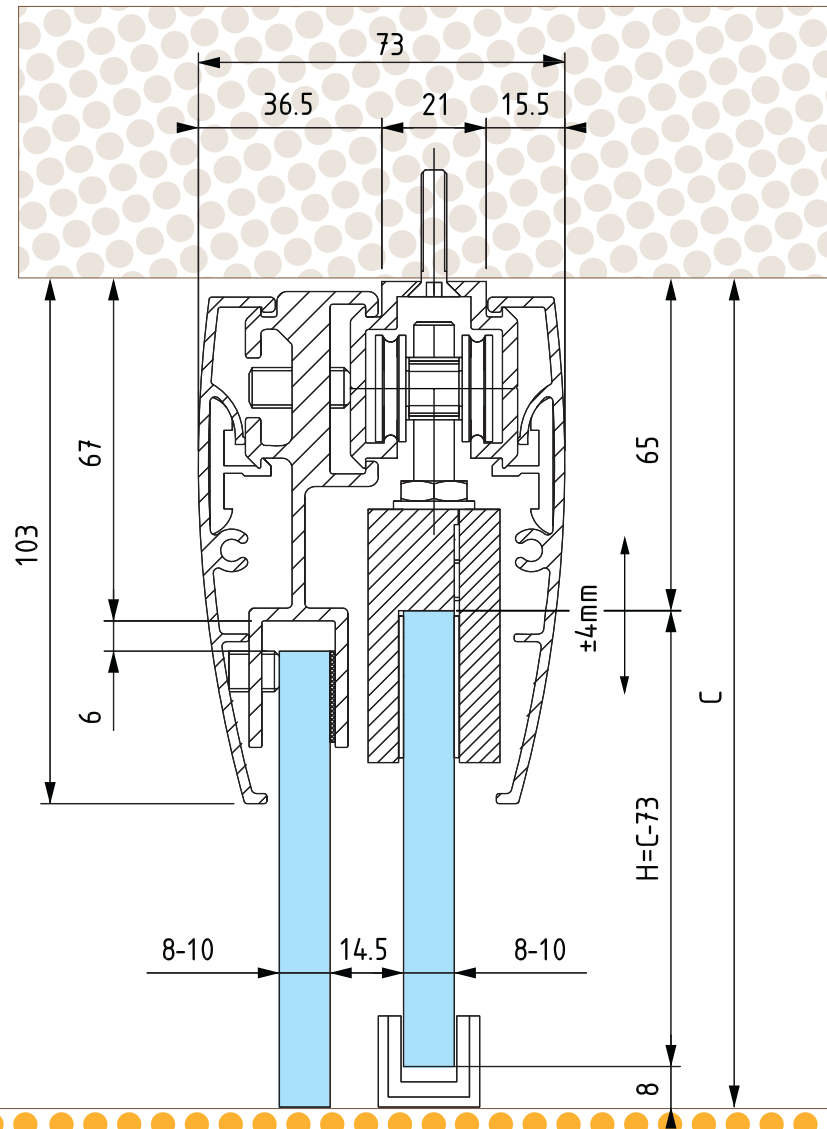

SLAK ist für vor der Wand laufende Glasblätter in Ein- und Zweiflügeliger Variante mit oder ohne Fixverglasung konzipiert. Seine zurückhaltende aber elegante Erscheinung macht SLAK in vielen Anwendungsbereichen interessant.

Gegenüber anderen Modellen dieser Art besticht SLAK durch seine geringen Baumasse sowie der dezenten Erscheinung.

Das System ist für Wand - oder Deckenmontage geeignet, und kann Glasblätter mit den Stärken 8 oder 10 mm aufnehmen.

Lassen sie sich von SLAK auch durch das überraschende Preis-Leistungsverhältnis überzeugen.
